

# الحديث الثالث عشر من كتاب الأربعين النووية بلغة الإشارة

محمود محمد أبو ازغرت

The image displays a grid of 12 rows and 12 columns, each containing a different hand gesture. The gestures are rendered in black and white, showing various hand shapes and finger configurations. The grid is arranged in a staggered pattern, where each row is offset from the one above it. The gestures include open palms, fingers pointing, hands forming circles, and more complex shapes. Some rows appear to contain identical or very similar gestures, suggesting a repeating sequence or a specific grouping of signs.
